

REMARKS

In reply to the office action mailed June 15, 2007, applicant submits the following remarks. Claims 1 and 24, the only pending independent claims, have been amended include the subject matter of claim 32. Applicant thanks the Examiner for finding claim 32 to include allowable subject matter. Specifically, the Examiner stated, "The prior art does not provide for the recited emissive layer that has a thermal energy of 0.0259 eV at a temperature of 300K." Thus applicant has incorporated this subject matter not only into claim 1, from which claim 32 previously depended, but also claim 24 because the Examiner found the subject matter not to be discussed by Young. Thus, applicant submits that claims 1 and 24 are now in condition for allowance. Claim 32 is canceled.

Claims 8, 13-14, 18 and 21 have been amended to add a colon. Claim 18 has also been amended to correct grammatical errors.

Applicant respectfully requests that the withdrawn method claims be rejoined per MPEP 821.04. The withdrawn method claims depend from independent claim 1 and necessarily include all of the limitations of claim 1 or 24. Therefore, applicant submits that rejoinder is proper.

Please apply any required charges or credits to deposit account 06-1050.

Respectfully submitted,

Date: 9/14/07
